PROFILE SUMMARY

Computer Science graduate from BK Birla Institute of Engineering & Technology, who recently completed CDAC training from CDAC Noida in August. I am interested in Data Analytics, Data Engineering, QA Engineering, Machine Learning, and Data Science, with hands-on knowledge of data visualisation, analytics, SQL, Python, and big data technologies. I possess strong problem-solving and analytical skills, along with the ability to quickly learn and adapt to new technologies. Passionate about using technology to solve real-world problems and build efficient, reliable, and data-driven solutions. In my free time, I enjoy reading fiction and non-fiction books, which helps me explore new ideas and broaden my perspective.

EDUCATION

- Centre for Development of Advanced Computing (C-DAC)**
Big Data Analytics Noida, Uttar Pradesh
August 2026
- BK Birla Institute of Engineering & Technology,**
B.Tech in Computer Science and Engineering Pilani, Rajasthan
2021 – 2025
- Prince Academy of Higher Education**
Senior Secondary (12th Grade) Sikar, Rajasthan
2021
- Birla Shishu Vihar**
Secondary (10th Grade) Pilani, Rajasthan
2019

SKILLS

Programming: Python, MySQL

Databases: MySQL, MongoDB

Cloud & Tools: AWS EC2, Git, Github, Jira, Postman(Basic)

Visualization: Tableau, Power BI

Microsoft PowerPoint, Microsoft Excel, Data Analysis, Communication

EXPERIENCE

- Data Analyst Intern Unified** Sept 2024 – Nov 2024
Skills: Python, pandas, numpy, Tableau
 - Cleaned, processed, and analyzed datasets using Python and SQL.
 - Performed exploratory data analysis (EDA) to identify trends and insights.
 - Created dashboards and visualizations using Power BI/Matplotlib.
 - Worked on real-world data analytics projects and reporting tasks.
 - Generated data-driven insights to support decision-making.

PROJECTS

- AI DOCTOR ASSISTANT PROJECT**
 - Developed an AI-powered Doctor Assistant to predict possible diseases based on user-provided symptoms.
 - Preprocessed and cleaned the medical dataset by handling missing values and converting categorical data into numerical features.
 - Trained and evaluated machine learning models to identify potential diseases from symptom patterns.
 - Designed an interactive application that allows users to enter symptoms and receive disease predictions along with relevant health recommendations.
 - Evaluated model performance using accuracy and other classification metrics to ensure reliable predictions.
- HEART DISEASE DATA ANALYSIS PROJECT**
 - Conducted data analysis on heart disease datasets using demographic and clinical data.
 - Cleaned and preprocessed data by handling missing values and converting categorical variables.
 - Created visualizations such as histograms, box plots, and bar charts for trend analysis.
 - Identified key insights, including higher prevalence in the 46–60 age group, greater incidence among males, and links between cholesterol levels and heart disease.
- DATA ANALYSIS PROJECT ON FIFA WORLD CUP STATISTICS**
 - Analyzed FIFA World Cup datasets including matches, players, and tournament outcomes.
 - Cleaned and preprocessed data for accurate analysis.
 - Created visualizations to study team performance and tournament trends.
 - Identified insights on scoring patterns, attendance, and winning strategies.
